

GABRIEL CRUZ

(832) 620-9310 | GabrielArquizaCruz@gmail.com | linkedin.com/in/gabriel-arquiza-cruz | github.com/gabrielzurc10 | gabriel-cruz.dev

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience designing and developing scalable cloud-native applications, distributed systems, and automation platforms. Led development of enterprise software across HR/payroll, telecommunications, and higher education platforms, driving operational efficiency through automation and intelligent tooling that saves organizations thousands of hours annually.

TECHNICAL SKILLS

Languages – JavaScript, TypeScript, Java, PHP, Python, C++, C#, SQL, HTML, CSS.

Frameworks and Libraries – React, Angular, Spring Boot, Node.js, Next.js, OpenAI API, FastAPI, Tailwind.

Database and Caching – MySQL, PostgreSQL, MongoDB, Firestore, DynamoDB, Redis, Couchbase, NoSQL.

Deployment and Cloud Platforms – Git, GitHub Actions, GitLab CI/CD, npm, Docker, Kubernetes, AWS, GCP, Terraform, Gradle.

PROFESSIONAL EXPERIENCE

Software Developer IV — Paycom

Irving, Texas | June 2025 – May 2026

- Led the design and delivery of 5+ automation features for Paycom's onboarding platform, applying test-driven development to ship reliably for 36,000+ client organizations ranging from small businesses to Fortune 500 enterprises.
- Automated employee data flow across the Applicant Tracking, Background Checks, and Onboarding modules through close collaboration with each module team, eliminating manual re-entry and cutting average HR processing time per new hire by 80%.
- Mentored junior software developers through code reviews, technical guidance, pair programming, and collaborative debugging sessions, improving development velocity, code quality, and adherence to engineering best practices across the team.

Software Developer III — Paycom

Irving, Texas | May 2024 – June 2025

- Architected and developed an onboarding email module with a dashboard built in React and Control-M—orchestrated queue-worker platform, processing thousands of concurrent async jobs to deliver 100,000+ new hire emails per month at scale.
- Built and containerized microservices with REST APIs in PHP for managing communication configurations, using Docker and Kubernetes to orchestrate deployment and reducing manual email coordination time for HR teams by 60%.
- Streamlined the rehire workflow for Paycom by leveraging Couchbase to cache and surface prior employee records, reducing manual PAF submissions and saving client HR teams an estimated 1,000+ hours annually across the client base.

Software Developer II — Paycom

Grapevine, Texas | January 2023 – May 2024

- Led development of international onboarding workflows across five countries, building an MVC architecture with PHP and JavaScript that dynamically rendered country-specific forms, streamlining onboarding and reducing manual setup effort by 80%.
- Designed, normalized, and optimized MySQL database schemas and query performance for high-traffic onboarding endpoints, improving average read response times by an estimated 40%.
- Delivered features through two-week Agile sprints, collaborating with a cross-functional team to maintain steady releases across planning, stand-ups, and retrospectives.

Application Developer — University of Houston, Enterprise Systems

Houston, Texas | October 2021 – December 2022

- Delivered full stack solutions for campus web applications used daily by 47,000+ students and 3,000+ faculty, developing backend services in Java and user interfaces with JavaScript.
- Modernized the UI/UX of the course marketplace and student information dashboard, leveraging JavaScript on the frontend and Java on the backend to improve navigation, accessibility, and visual consistency.
- Integrated PeopleSoft campus solution software with custom-built tools and tuned PostgreSQL schemas, improving query performance on high-volume endpoints.

Software Engineer Intern — T-Mobile

Frisco, Texas | May 2022 – August 2022

- Developed full stack customer location visualization for support agents, with Spring Boot REST APIs in Java and Angular dashboard components, reducing average call-handle time by 60% and accelerating issue resolution.
- Authored and published an internal Node.js npm package that standardized API authorization across T-Mobile services, eliminating repeated auth boilerplate for 10+ engineering teams.
- Delivered projects through full Agile development cycles and presented sprint demos to development teams and stakeholders, aligning on priorities and incorporating feedback across iterations.

PROJECTS

rabbitrole — AI Resume Reviewer & Job Matcher

rabbitrole.com

- Created an AI resume reviewer and job matcher that gives job seekers specific feedback and roles they actually fit. Users upload a resume, and the AI returns severity grouped feedback with suggested fixes, then finds matches with live job postings.
- Developed with a React, Next.js, TypeScript, and Tailwind frontend on S3 and CloudFront, and a Spring Boot backend running on AWS Lambda with DynamoDB and Cognito auth, powered by OpenAI models and RAG grounded in live job postings.
- Automated infrastructure and deployments with Terraform and GitHub Actions, shipping a serverless stack that runs at one to two dollars per month and showcases end to end ownership across frontend, backend, AI, and DevOps.

Gabriel Cruz — Personal Website with AI Assistant

gabriel-cruz.dev

- Built a personal website featuring an AI assistant that answers questions about my background and experience, using a Next.js, React, and TypeScript frontend statically served through Amazon S3 and CloudFront.
- Engineered the AI assistant to stream LLM responses over Server Sent Events with a Python FastAPI backend, maintaining conversation memory per session and a system prompt hardened against prompt injection.
- Provisioned the full AWS stack as code with Terraform, including Lambda, API Gateway, S3, CloudFront, and Route 53, and automated deployments through GitHub Actions, achieving \$0 compute cost at idle and scaling automatically under load.

EDUCATION

Bachelor of Science in Computer Science — University of Houston

Houston, Texas | August 2020 – December 2022
