

GABRIEL CRUZ

Irving, TX | (832) 620-9310 | GabrielArquizaCruz@gmail.com | linkedin.com/in/gabriel-arquiza-cruz | github.com/gabrielzurc10

PROFESSIONAL SUMMARY

Software Engineer with over 4 years of experience designing, developing, and deploying scalable full-stack applications. Skilled in Java, Spring Boot, Python, JavaScript, TypeScript, React, and Node.js, with strong knowledge of REST APIs, microservices, containerization, SQL and NoSQL databases, and cloud platforms including AWS. Writes clean, maintainable code applying SOLID principles, testing, and CI/CD, and owns projects from requirements through deployment.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, PHP, C#, C++, SQL, HTML, CSS.

Frameworks & Libraries: Spring Boot, React, Angular, Node.js, Next.js, FastAPI, Tailwind CSS, OpenAI API.

Databases & Caching: MySQL, PostgreSQL, DynamoDB, Couchbase.

Cloud & DevOps: AWS, Lambda, S3, CloudFront, API Gateway, Cognito, Docker, Kubernetes, Kafka, Terraform, GitLab CI/CD, GitHub Actions, Git, Gradle, npm.

Practices: Agile, Scrum, RESTful API Design, Microservices, Event-Driven Architecture, CI/CD, Test-Driven Development, Cross-Functional Collaboration, Code Review, Technical Mentorship.

PROFESSIONAL EXPERIENCE

Paycom | Cloud-based HCM and payroll software

Software Engineer IV, III, II | Grapevine, TX | January 2023 – May 2026

- Led development of 5 automation initiatives across event-driven microservices, workflow engines, and REST API integrations, partnering with HR teams to eliminate an estimated 1,000 hours of manual work per year.
- Designed and built a notification scheduling system to automate onboarding communications, reducing email coordination time by 80%.
- Developed a configurable form-templating system that standardized onboarding across 5 countries, reducing setup time by 60%.
- Implemented CI/CD pipelines to automate testing and deployment, cutting release time from 2 hours to 20 minutes.

University of Houston, Enterprise Systems | Manages UH's core administrative and academic software

Software Engineer | Houston, TX | October 2021 – December 2022

- Delivered full-stack web applications used daily by more than 47,000 students and faculty, automating manual processes by 55%.
- Enhanced the student information dashboard and course marketplace by refactoring REST APIs, reducing page load times by 70%.
- Optimized database schemas by rewriting joins, adding indexes, and introducing caching, reducing query times by 50%.

T-Mobile | Telecommunications and wireless carrier

Software Engineer Intern | Frisco, TX | May 2022 – August 2022

- Accelerated customer support by releasing a customer location indicator component on T-Mobile's 5G coverage map, speeding coverage diagnosis and reducing average call-handle time by 30%.
- Published an internal Node.js library that standardized proof-of-possession token authorization across T-Mobile services, driving adoption across 5 engineering teams and saving an estimated 200 hours of boilerplate setup.

PROJECTS

rabbitrole – AI Resume Reviewer and Job Matcher | rabbitrole.com

- Built an AI resume reviewer and job matcher that critiques resumes and ranks live job postings using LLMs and a RAG pipeline.
- Secured user logins with Amazon Cognito and Google OAuth, including token refresh and session handling.
- Deployed a Spring Boot backend on AWS Lambda with DynamoDB, achieving a serverless architecture that scales on demand.

Personal Website with AI Assistant | gabriel-cruz.dev

- Released a personal website with an AI assistant using LLMs to answer questions about my professional background.
- Architected the frontend to be statically served from S3 and CloudFront utilizing CDN and caching, resulting in fast global page loads.
- Provisioned the AWS architecture as code with Terraform and CI/CD with GitHub Actions, automating builds and deployments.

EDUCATION

Bachelor of Science in Computer Science

University of Houston | Houston, TX | August 2020 – December 2022
