

GABRIEL CRUZ

Irving, TX | (832) 620-9310 | GabrielArquizaCruz@gmail.com | linkedin.com/in/gabriel-arquiza-cruz | github.com/gabrielzurc10

PROFESSIONAL SUMMARY

Software Engineer with 4+ years building full-stack, cloud-native applications across HR technology, telecom, and higher education. Skilled in Java and Spring Boot microservices, React and TypeScript frontends, and AWS serverless architecture, with a record of shipping scalable systems and partnering with cross-functional teams to deliver measurable business impact.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, PHP, C#, C++, SQL, HTML, CSS.

Frameworks & Libraries: Spring Boot, React, Angular, Node.js, Next.js, FastAPI, Tailwind CSS, OpenAI API.

Databases & Caching: MySQL, PostgreSQL, DynamoDB, Couchbase.

Cloud & DevOps: AWS Lambda, S3, DynamoDB, CloudFront, API Gateway, Cognito, Docker, Kubernetes, Kafka, Terraform, GitLab CI/CD, GitHub Actions, Git, Gradle, npm.

Practices: Agile, Scrum, RESTful API Design, Microservices, Event-Driven Architecture, CI/CD, Test-Driven Development, Cross-Functional Collaboration, Code Review, Technical Mentorship.

PROFESSIONAL EXPERIENCE

Software Developer IV, III, II

January 2023 – May 2026

Paycom

Grapevine, TX

- Led development of 5 automation initiatives across event-driven microservices, workflow engines, and REST API integrations, partnering with HR stakeholders to eliminate an estimated 1,000+ hours of manual work per year.
- Designed a high-throughput communication platform on a Kafka-backed delivery pipeline with a React and TypeScript frontend, delivering 100,000+ emails monthly and replacing a manual, cross-team coordination process.
- Containerized and deployed microservices on Docker and Kubernetes, building GitLab CI/CD pipelines with automated unit tests and lint checks to standardize releases and block broken builds.
- Developed a configurable form-templating system that localized onboarding across five countries, cutting manual setup time by 80%.
- Optimized high-traffic data endpoints by rewriting MySQL joins, adding indexes, and introducing Couchbase caching, reducing p95 read latency by 50%.

Application Developer

October 2021 – December 2022

University of Houston, Enterprise Systems

Houston, TX

- Delivered full-stack web applications used daily by 47,000+ students and faculty to register for courses, submit and access grades, and manage records, replacing manual, paper-based processes.
- Rebuilt the student information dashboard frontend in JavaScript with responsive mobile support and WCAG-compliant screen-reader accessibility, and refactored Java REST APIs to cut page load times by 70%.
- Normalized PostgreSQL schemas to eliminate redundant data slowing high-volume endpoints, reducing query times by 50%.

Software Engineer Intern

May 2022 – August 2022

T-Mobile

Frisco, TX

- Equipped support agents with a TypeScript and Angular dashboard backed by Java and Spring Boot REST APIs that plotted customer location on T-Mobile's 5G coverage map, speeding coverage diagnosis and reducing average call-handle time by 30%.
- Published an internal JavaScript library that standardized proof-of-possession token authorization across T-Mobile services, driving adoption across 5+ engineering teams and saving an estimated 200+ hours of boilerplate setup.

PROJECTS

rabbitrole – AI Resume Reviewer and Job Matcher

rabbitrole.com

- Built an AI resume reviewer and job matcher that critiques resumes and ranks job postings using OpenAI LLMs and a RAG pipeline.
- Structured the matching engine that embeds resumes and job descriptions to score relevance and rank recommendations.
- Secured user accounts with Amazon Cognito and Google OAuth, including token refresh and session handling.
- Deployed a Spring Boot backend on AWS Lambda with DynamoDB, served through CloudFront.

Personal Website with AI Assistant

gabriel-cruz.dev

- Released a personal website with an AI assistant using OpenAI, Python, and FastAPI to answer questions about my background.
- Architected a Next.js, React, and TypeScript frontend, statically served from S3 and CloudFront for fast global page loads.
- Provisioned the AWS stack with Terraform and CI/CD via GitHub Actions, including Lambda, API Gateway, S3, and CloudFront.
- Engineered the serverless architecture for \$0 idle compute cost, scaling on demand.

EDUCATION

Bachelor of Science in Computer Science

August 2020 – December 2022

University of Houston

Houston, TX
