SUMMARY

Software Engineer with 4+ years building enterprise-scale software across HR/payroll, telecommunications, and higher education organizations. Proficient in Java, Spring Boot, Python, PHP, TypeScript, Angular, React, Docker and AWS. Shipped features serving 36,000+ organizations and automated workflows that cut processing times by up to 80%.

SKILLS

Languages – PHP, Java, JavaScript, TypeScript, Python, SQL, HTML, CSS.

Frameworks and Libraries – Spring Boot, React, Angular, Node.js, Next.js, OpenAI API, FastAPI, Tailwind.

Database and Caching – MySQL, PostgreSQL, DynamoDB, Couchbase, NoSQL.

Deployment and Cloud Platforms – Docker, Kubernetes, AWS, Git, GitHub Actions, GitLab CI/CD, npm, Terraform, Gradle.

EXPERIENCE

Software Developer II → IV

January 2023 – May 2026

Paycom | Grapevine, Texas

- Led 5+ projects automating onboarding workflows, reducing new-hire processing time by 80%.
- Released an email communication module built with PHP and React, delivering 100,000+ emails monthly.
- Containerized PHP microservices with Docker and Kubernetes, standardizing releases and reducing deployment errors.
- Automated onboarding workflows across five countries using PHP/JavaScript MVC architecture, reducing manual setup by 60%.
- Tuned MySQL schemas and introduced Couchbase caching on a high-traffic onboarding endpoint, halving read latency.

Application Developer

October 2021 – December 2022

University of Houston, Enterprise Systems | Houston, Texas

- Delivered full-stack web applications used daily by 47,000+ students and faculty members.
- Modernized the student information dashboard in JavaScript and Java, improving accessibility and load times by 40%.
- Normalized PostgreSQL schemas, improving query performance on high-volume endpoints by 50%.

Software Engineer Intern

May 2022 – August 2022

T-Mobile | Frisco, Texas

- Accelerated support agent workflows with Spring Boot REST APIs and an Angular dashboard, cutting call-handle time 60%.
- Published a Node.js authorization library on npm that eliminated boilerplate, adopted across T-Mobile's internal services.
- Collaborated through pair programming and code reviews, improving code quality and accelerating feature delivery.

PROJECTS

rabbitrole

rabbitrole.com

AI Resume Reviewer and Job Matcher

- Built an AI resume reviewer and job matcher that critiques resumes and ranks live postings with OpenAI LLMs and RAG pipeline.
- Designed the matching engine that embeds resumes and job descriptions to score relevance and rank job recommendations.
- Secured user accounts with Amazon Cognito and Google OAuth, including token refresh and session handling.
- Deployed a Spring Boot backend on AWS Lambda with DynamoDB, served through CloudFront.

Personal Website with AI Assistant

- Released a personal website with an AI assistant using OpenAI, Python, and FastAPI to answer questions about my background.
- Architected a Next.js, React, and TypeScript frontend, statically served from S3 and CloudFront for fast page loads.
- Provisioned the AWS stack with Terraform and CI/CD via GitHub Actions, including Lambda, API Gateway, S3, and CloudFront.
- Engineered the serverless architecture for \$0 idle compute cost, scaling on demand.

EDUCATION

Bachelor of Science in Computer Science

August 2020 – December 2022

University of Houston | Houston, Texas
