PROFESSIONAL SUMMARY

Software Developer with 4+ years of experience building full-stack applications across HR technology, telecommunications, and higher education. Skilled in Java, C#, React, Angular, and TypeScript. Shipped features serving 36,000+ organizations and automated workflows saving thousands of hours annually, owning projects from requirements through deployment.

SKILLS

Languages: Java, C#, TypeScript, JavaScript, SQL, HTML, CSS.

Frameworks & Libraries: Spring Boot, .NET, React, Angular, Node.js, Next.js, FastAPI, Tailwind CSS.

AI: Claude Code, OpenAI API, RAG, Agent Orchestration, Prompt Engineering, MCP.

Databases & Caching: MySQL, PostgreSQL, DynamoDB, Couchbase.

Cloud & DevOps: AWS, Docker, Kubernetes, Kafka, Terraform, GitLab CI/CD, GitHub Actions, Git.

PROFESSIONAL EXPERIENCE

Software Developer IV, III, II

January 2023 – May 2026

Paycom | Cloud-based HCM and payroll software

Grapevine, TX

- Led development of 5 automation initiatives using event-driven microservices, workflow engines, and REST API integrations, partnering with HR stakeholders to eliminate an estimated 1,000+ hours of manual work per year.
- Designed and built a notification scheduling dashboard utilizing Kafka-backed delivery pipeline, handling 100,000+ emails monthly and reducing email coordination time by 80%.
- Developed a configurable form-templating system using containerized microservices with Docker and Kubernetes, standardizing onboarding across 5 countries and reducing setup time by 60%.
- Implemented GitLab CI/CD pipelines to automate unit testing and deployment, cutting release time from 2 hours to 20 minutes.

Application Developer

October 2021 – December 2022

University of Houston

Houston, TX

- Built full-stack applications used daily by 47,000+ students and faculty for course registration, grade submission, and records management.
- Cut page load times by 70% on the student information dashboard and course marketplace by adding pagination and response caching to the REST APIs behind them.
- Reduced query times by 50% on high-volume endpoints by rewriting joins, adding indexes, and introducing caching.

Software Engineer Intern

May 2022 – August 2022

T-Mobile

Frisco, TX

- Accelerated customer support by releasing a customer approximate location indicator component on T-Mobile's 5G coverage map, speeding coverage diagnosis and reducing average call-handle time.
- Published an internal Node.js library that standardized proof-of-possession token authorization across T-Mobile services, saving hours of boilerplate setup.

PERSONAL PROJECTS

rabbitrole – AI Resume Reviewer and Job Matcher

rabbitrole.com

- Built an AI resume reviewer and job matcher that critiques resumes and ranks live job postings using prompt engineering and a RAG pipeline.
- Deployed a Java and Spring Boot backend on AWS Lambda with DynamoDB, achieving a serverless architecture that scales on demand.
- Engineered the matching engine using agent orchestration that embeds resumes and job descriptions to score relevance and rank recommendations.

Personal Website with AI Assistant

gabriel-cruz.dev

- Released a personal website with an AI assistant using OpenAI API, Python, FastAPI, and prompt engineering to answer professional background questions.
- Provisioned the AWS architecture as code with Terraform and CI/CD with GitHub Actions, automating builds and deployments.
- Architected a Next.js, React, and TypeScript frontend to be statically served from S3 and CloudFront, resulting in fast global page loads.

EDUCATION

Bachelor of Science in Computer Science

University of Houston

August 2020 – December 2022

Houston, TX
